

#11 Ackvirera platser (endast digitalt) - Skicka förhandsgranskning av mejl till dig själv

The screenshot shows the Prao system interface. On the left is a dark sidebar menu with the following items: Prao Gänefs kommun, Prao Gävle kommun, Skolors behov, Ackvirera platser (highlighted in red), Arbetsplatser, Elevers val, Rapport, elevers val, Praokort, Extragäster, skolmatsalar, Arkiv, Behörigheter, Inställningar, and Lathund administration. The main content area has a header with 'Meny ackvirera platser' and a dropdown menu showing 'E-postmeddelandets innehåll'. Below the header, the title 'E-postmeddelandets innehåll - Prao' is displayed. The main text area contains a message about the autumn term 2022, stating that many interesting Prao positions are available for primary school students in Gävle municipality. It explains the purpose of Prao is for students to gain insight into different occupational areas and feel what work can be like. It lists tasks such as identifying relevant occupations, skills, and knowledge, and understanding the working conditions and industry. It mentions that the AFS2012:3 regulation applies as a basis for approved work assignments, working hours, etc. It states that students should follow the supervisor's working hours in the month it goes. According to AFS2012:3, working hours for older children are max 7 h/day inclusive lunch. It asks them to fill in which schools they have and which periods. It asks them to fill in how many positions they can take on and which periods. It says they can fill in more than one school. It says they can previously have received their mail address and this information via mail can be distributed to fill in their positions via the link in the mail. It says they do not need to send back this blank form. It asks them to fill in the link in the mail or send back this questionnaire at the latest 1 July. It thanks them for their engagement for the primary school students. At the bottom, there are two links: 'Ändra text i ackvireringens e-postmeddelande' and 'Skicka e-postmeddelande till dig själv' (highlighted in yellow).

Om er kommun ackvirerar praoplatser endast digitalt kommer ni från ackvireringssidan kunna skicka ett e-postmeddelande till er själva för att kunna förhandsgranska hur ert meddelande ser ut när ni väl skickar ut det till arbetsgivarna.
